

March 28, 1953

Dr. H. E. Alexander
Babies Hospital
New York 32, N.Y.

Dear Dr. Alexander:

Whenever it is convenient for you, I would appreciate your sending me reprints of the following:

Zamenhof et al. 1952 Arch. Biochem. Biophys. Purification of the DPNA of Hemophilus.....

Alexander and Leidy 1952 Induction of streptomycin resistance....

As you may imagine, I would be pleased to have a fairly complete file of your publications on this subject, which impinges so closely on my own work. It would be reassuring if I could rely on my being on your mailing list, which favor I am very happy to reciprocate. Your reprints that I now have number:

Alexander and Leidy J Exp. Med. 1951

Ib. Proc. Soc. Exp. Biol. Med. 1950.

I would be grateful to have any gaps filled as it may be convenient for you.

Yours sincerely,

Joshua Lederberg
Associate Professor of Genetics
